

Churn Analysis of Fit.Ly

Corey Toomey
DataCamp
Data Analyst Certification

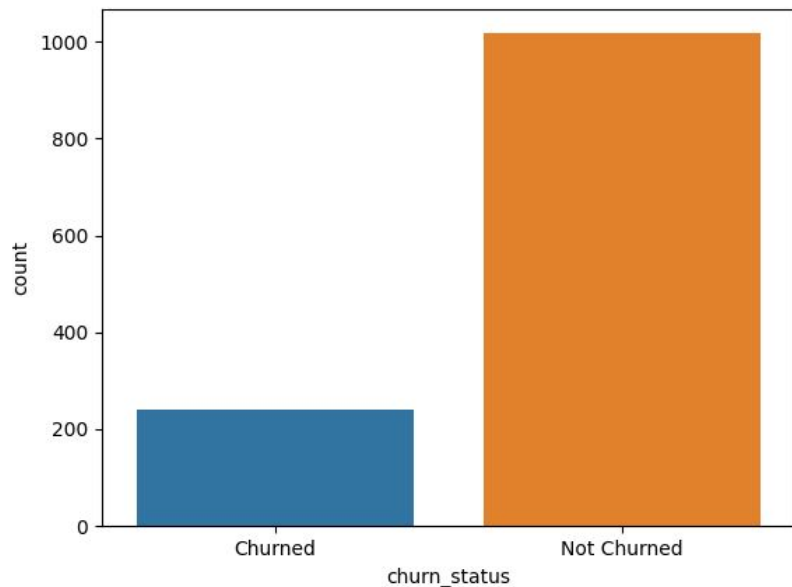

What is Fit.Ly?

- Fitness smartphone app
- Offers articles, videos about physical fitness
- Offers workout tracking and workout sharing on social media

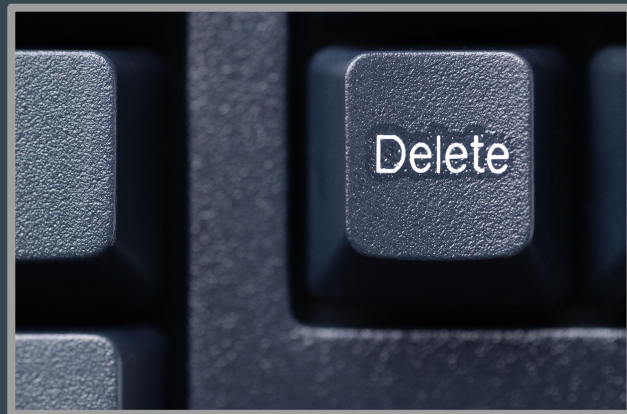

Churn Problem

- Fit.Ly is seeing a sudden increase in customers leaving
- 240 customers have churned ($\frac{1}{5}$ of users)
- Fit.Ly needs to retain customers to optimize growth

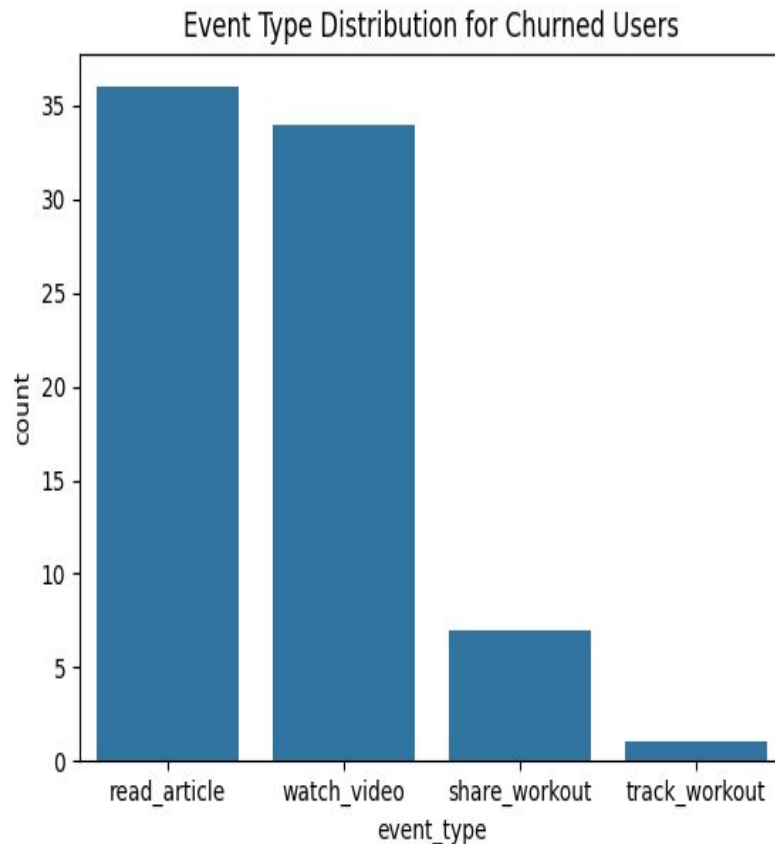

Data and Cleaning Summary

- 43 customers requested deletion via customer support tickets
- 184 records removed
- 3 datasets used
- Standardized user_id across tables and merged for actionable insight
- Separated Churned users from Active

Churn Analysis

- Churned customers were passive users
- 90% of activity either reading articles or watching videos
- Did not use core app features
- NOT the specific cause for churn

Customer Support Times: Churned vs. Active

- Churned customers experienced higher issue resolution times

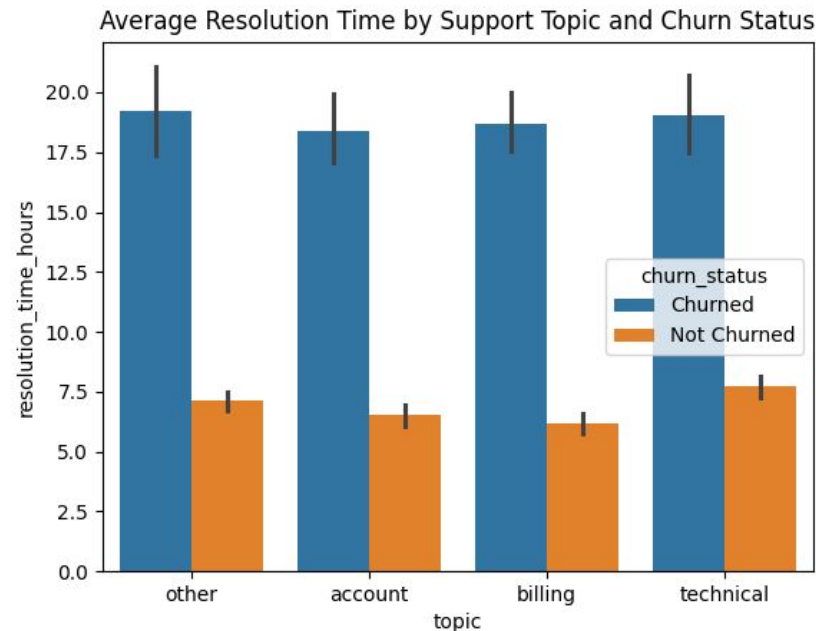

Active customer average:

6.87 hours

Churn resolution average:

18.82 hours

OVER 2.5 TIMES HIGHER

Business Metric and Why this Matters

- Fit.Ly needs to watch churn rate
- Current baseline is 19%
- Improving retention leads to higher recurring revenue
- Stronger customer loyalty
- Lower marketing spend

Recommendation #1

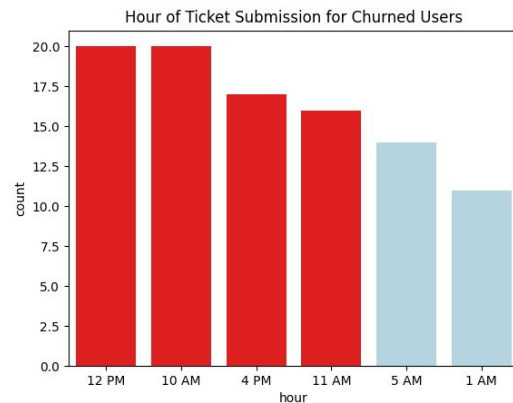

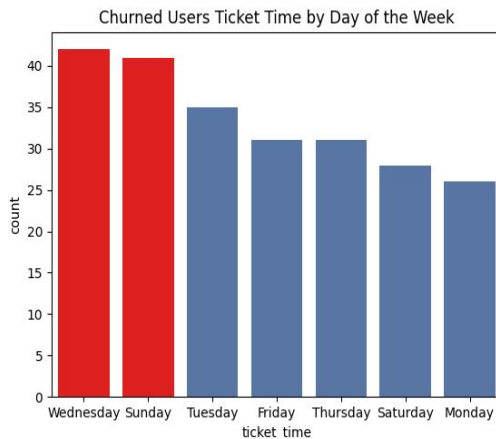

Increase Customer Engagement

- Passive users → Active users
 - Use call-to-action in articles and videos
 - Direct customers into workout activities
- Ex. *“Enjoy this article? TRY THESE WORKOUTS NOW!”*

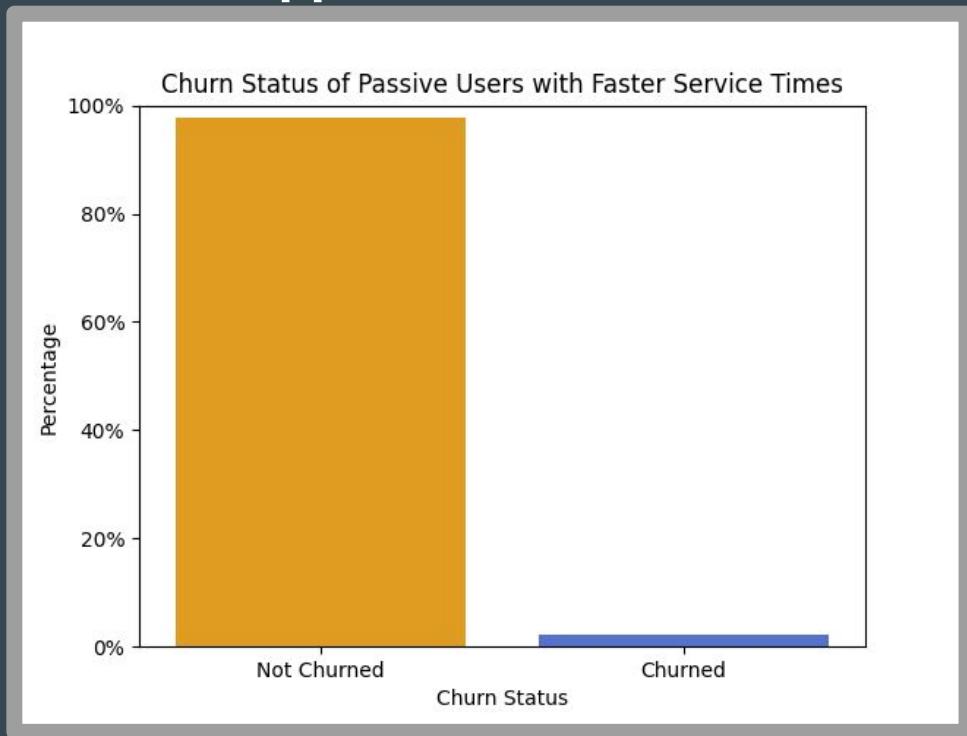

Recommendation #2: Lower Issue Resolution Times

- Focus on Wednesdays and Sundays, 10 AM - 4 PM PT
- Use AI chatbot
- Modify employee scheduling, retrain customer service reps
- First Priority for request times going over 7 hours

Recommendation Test: Lower customer support times

- Checked data for passive users
- Specified customer support time of 7 hours or fewer (range of average of 6.87)
- Showed 98% retention rate
- Timely customer support makes a difference!

Closing

- [Fit.Ly](#) needs to improve and monitor customer support metric
- Lower issue resolution times
- Engage passive users
- Potentially keep 98% of users who may leave
- Retain revenue and lower marketing spend
